

Nguyen Trong Thang

Backend | Frontend Developer

 Zalo/WhatsApp 0358045997  shaynenguyen9@gmail.com
 <https://thangnt.vercel.app>  Hanoi, Vietnam

OBJECTIVE

Long term goal: Fullstack developer

EDUCATION

Aptech Vietnam 2022 - 2024
ADSE (Aptech Certified Computer Professional)

WORK EXPERIENCE

Behemoth co.ltd 08/2022 - 05/2026

Role: Backend & Frontend Developer

Contribute:

- Contributed to **large-scale projects** across different domains
- Designed and implemented **backend APIs** handling millions of data records daily
- Collaborated with **cross-functional teams** to ship features end-to-end
- Leveraged **AI-assisted development tools** such as **Claude Code** to accelerate software development workflows, including code generation, specification analysis, and implementation planning
- Applied AI tools to **optimize development processes**, improve engineering productivity, and reduce feature delivery time

Freelance & Independent Projects 06/2025 - Now

Role: Backend & Frontend Developer

Contribute:

- Built experience developing **scalable backend systems** for **realtime trading** and financial data platforms
- Worked with **high-volume realtime data processing**, improving system performance, reliability, and data synchronization
- Strengthened problem-solving skills through optimization of latency-sensitive and data-intensive applications
- Worked across both backend and frontend development in fast-paced product environments
- Applied **AI-assisted** development workflows to accelerate implementation, planning, and code optimization

SKILLS

Language	Ruby, Golang, PHP, Python, MQL5, Typescript, Javascript, SQL, C#
Data & Streaming	PostgreSql, MySql, MongoDB, Redis, ClickHouse, DynamoDB, Apache Airflow, MQTT, Apache Spark
Framework	Ruby on Rails, Gin, Fiber, FastAPI, Vuejs, Flutter, React, NextJs, Tailwind CSS, Pydantic, Celery, Scrapy, Selenium, Playwright, NumPy, Pandas, gRPC, GraphQL, WebSocket
Infrastructure	Docker, Kubernetes, RackSpace, Helm Chart, Linux, GCP, AWS
Tool & Workflow	Git, GitHub, Linear, VS Code, Claude Code, Make

PROJECT

Wills DYC 12/2025 - 05/2026

Role: BE & FE Developer

Techstack: Golang, React, gRPC

Contribute: Built and optimized **RESTful API** and complex **transaction processing logic** for a large-scale shareholder reward management platform

Description: DYC is a **shareholder engagement and reward management system** that supports appreciation events, gift redemption, and shareholder-related activities for enterprises

Yobimori

07/2025 - 05/2026

Role: Fullstack Developer

Techstack: AWS, Lambda, Golang, GraphQL, Java, React, Flutter, IoT Protocol

Contribute: Maintained and extended **microservices** architecture, developed APIs, mobile app, and managed deployments with **AWS** monitoring.

Description: A **marine rescue and mutual aid platform** that supports fishermen and rescue teams through **real-time location tracking** and emergency coordination during marine accidents. The system integrates **IoT protocols** for offshore data transmission and is built on a scalable **AWS cloud architecture** using **AWS Lambda**, **GraphQL**, **Golang**, and **Java**. It also includes **Flutter mobile applications** optimized for real-time communication and high availability.

Bottos

12/2025 - 05/2026

Role: BE & FE Developer

Techstack: Golang, Redis, Vue.js, LINE Messaging API, Railway

Contribute: Built **RESTful API** and UI, integrated **Stripe** payment, and implemented **real-time** UI update features.

Description: A LINE LIFF-powered web app that lets customers book seats, check in, and access co-working café services directly within LINE chat.

LineShop

04/2025 - 05/2026

Role: BE & FE Developer

Techstack: Ruby on Rails, Redis, GraphQL, LINE Messaging API, Nuxt, Vue.js

Contribute: Developed backend and frontend features, Integrated **LINE Messaging API** and **GraphQL** services for customer communication and real-time interactions.

Description: Full e-commerce and customer communication platform built around the **LINE ecosystem**. Multi-tenant OEM deployment with white-label customization, AI chatbot support, and polyglot microservices architecture.

FinanceHub - Wise Chart Signal

09/2025 - Now

Role: BE & FE Developer

Techstack: Python, FastAPI, ClickHouse, PostgreSQL, Kubernetes, Pydantic, Celery, NumPy, Pandas, React, Next.js, Apache Airflow, Apache Spark

Contribute: Developed backend APIs with **Python FastAPI** for trading and analytics features, built frontend components using Next.js for financial dashboards, Managed large-scale historical **data pipelines** with Apache Airflow, Apache Spark, and ClickHouse

Description: Signal View is a web-based stock market analytics platform that combines trading strategy execution, historical backtesting, and **large-scale financial data processing**

Smart Invoice

09/2025 - 05/2026

Role: BE & FE Developer

Techstack: Ruby on Rails, Redis, AWS, React

Contribute: Deployed **GraphQL API** system and implemented CSV data import job logic.

Description: An electronic invoicing management platform that enables businesses to create, store, and track invoices online quickly, accurately, and in compliance with regulations.

FinanceHub - Signal Router

06/2025 - Now

Role: BE & FE Developer

Techstack: Golang, Fiber, Redis, Kubernetes, React, Next.js, MQTT, MQL5

Contribute: Built **APIs** and frontend UI, developed **realtime trading** data management systems, integrated **MQTT** communication for low-latency signal delivery, and worked with **MQL5** to support synchronized multi-account trading execution across brokers

Description: Intelligent **trading platform** that enables users to connect trading signals, execute **synchronized** trades across multiple accounts and brokers, and manage realtime trading data efficiently through unified symbol mapping and automated trading workflows.

Vibico System <i>Role:</i> BE & FE Developer <i>Techstack:</i> Golang, Redis, Vue.js, gRPC <i>Contribute:</i> Developed GraphQL API system, built UI, and integrated VNPay payment via gRPC. <i>Description:</i> A premier website dedicated to organizing professional billiards tournaments.	01/2025 - 05/2026
Mei-wa <i>Role:</i> BE & FE Developer <i>Techstack:</i> Ruby on Rails, React <i>Contribute:</i> Developed RESTful API and user interface <i>Description:</i> A social welfare management platform designed to support elderly and disabled individuals within the community efficiently and transparently.	12/2025 - 04/2026
Redaiku <i>Role:</i> BE & FE Developer <i>Techstack:</i> Golang, Redis, Asynq, Vue.js, Flutter <i>Contribute:</i> Built RESTful API system and implemented async workers for real-time notifications reaching millions of users. <i>Description:</i> A side job matching service specialized for the construction industry that connects workers looking for work with clients looking for laborers.	07/2024 - 04/2025
Tence <i>Role:</i> BE & FE Developer <i>Techstack:</i> Ruby on Rails, GraphQL, Redis, Sidekiq, Vue.js <i>Contribute:</i> Designed and built GraphQL API system with Sidekiq jobs for asynchronous data migration from legacy database to new structure with hundreds of millions of records. <i>Description:</i> A high-performance data processing system designed for fire protection management.	05/2023 - 02/2026
Eco Crawler <i>Role:</i> BE Developer <i>Techstack:</i> Python, MongoDB, Scrapy, Playwright, Selenium <i>Contribute:</i> Built a web crawler system to collect, process, and store data into MongoDB . <i>Description:</i> Crawled trading data from domestic and foreign news sites.	12/2023 - 04/2024
Posiwill <i>Role:</i> BE & FE Developer <i>Techstack:</i> PHP Laravel, Vue.js <i>Contribute:</i> Maintained and extended RESTful API system and managed SQL database. <i>Description:</i> An administration page, an important part of a website system developed towards microservices.	05/2023 - 11/2023
All In One <i>Role:</i> BE & FE Developer <i>Techstack:</i> Ruby on Rails, Vue.js, Flutter <i>Contribute:</i> Participated in designing and building a GraphQL API system for managing internal company projects and resources. <i>Description:</i> Management website developed according to the Jira Atlassian model. Integrated third-party services: Slack API, GitHub API, and data crawling from Jira.	08/2023 - 12/2024
SongPhuongFood <i>Role:</i> BE & FE Developer <i>Techstack:</i> PHP, SQL, HTML, CSS, Soft UI Dashboard <i>Contribute:</i> Built core functions, optimized SQL queries, and developed the admin dashboard and landing page. <i>Description:</i> E-commerce website built using pure PHP and Soft UI Dashboard PRO.	08/2023 - 10/2023

UnicornCart

08/2022 - 06/2023

Role: BE Developer

Techstack: Ruby on Rails, GraphQL, Redis, Sidekiq, Vue.js, Nuxt

Contribute: Contributed to building **GraphQL API** system and integrated payment methods with **PayJP** and **GMO**.

Description: A comprehensive order management platform with a landing page feature. Users can create multiple domains for different customers and manage product listings on each landing page. The platform also supports various shipping carriers, product restocking, and multiple payment gateways including PayJP, PayPal, and GMO.
